

DEPLOYMENT GUIDE

Custom Home Builder Website - Ready to Launch

WHAT YOU HAVE

Your website is **100% complete** and ready to deploy! Here's what's included:

✓ Files Included:

- `index.html` - Complete website (HTML + CSS + JavaScript all-in-one)
- `images_optimized/` - 12 professional images (optimized for web, 66% smaller)
- `images/` - Original high-resolution images (backup)
- This deployment guide
- Implementation checklist
- Complete README

✓ Features Included:

- Fully responsive design (mobile, tablet, desktop)
 - Professional navigation with smooth scrolling
 - Hero section with custom copywriting
 - 3 value proposition cards with stunning images
 - Feature section with construction imagery
 - 3 home model pricing tiers
 - Stats section with aerial photography
 - Gallery showcasing your process
 - Complete footer with contact information
 - Modern animations and transitions
 - Fast loading (optimized images)
-

DEPLOYMENT OPTIONS

Option 1: Netlify (Recommended - FREE & EASY)

Why Netlify:

- ✓ Free hosting
- ✓ Custom domain support
- ✓ Automatic HTTPS/SSL
- ✓ Instant deployment
- ✓ Perfect for static sites

Steps:

1. Go to <https://www.netlify.com>

2. Sign up for free account
3. Click "Add new site" → "Deploy manually"
4. Drag and drop your entire `custom_home_builder_website` folder
5. Your site is live instantly!
6. Custom domain: Site settings → Domain management → Add custom domain

Estimated time: 5 minutes

Option 2: Vercel (Also FREE)

Why Vercel:

- ☒ Free hosting
- ☒ Excellent performance
- ☒ Easy custom domains
- ☒ Automatic SSL

Steps:

1. Go to <https://vercel.com>
2. Sign up for free
3. Click "Add New" → "Project"
4. Upload your folder
5. Deploy!

Estimated time: 5 minutes

Option 3: GitHub Pages (FREE)

Why GitHub Pages:

- ☒ Free hosting
- ☒ Version control included
- ☒ Good for portfolios

Steps:

1. Create GitHub account (github.com)
2. Create new repository called `your-business-name`
3. Upload all files
4. Go to Settings → Pages
5. Select main branch → Save
6. Site live at `yourusername.github.io/your-business-name`

Estimated time: 10 minutes

Option 4: Traditional Web Hosting

For cPanel/traditional hosting:

1. **Purchase hosting** (recommended providers):
 - SiteGround (~\$4/month)

- Bluehost (~\$3/month)
- VentralP (Australian, ~\$10/month)

2. Upload files via FTP:

- Use FileZilla (free FTP client)
- Connect to your hosting
- Upload all files to `public_html` or `www` folder

3. Connect domain:

- Point domain nameservers to hosting provider
- Wait 24-48 hours for propagation

Estimated time: 30 minutes + propagation wait

CUSTOM DOMAIN SETUP

Register Domain Name

Recommended domain extensions:

- `.com.au` - Best for Australian businesses
- `.com` - Universal option
- `.net.au` - Alternative

Domain suggestions based on your content:

- `[yourname]customhomes.com.au`
- `westernsydneycustomhomes.com.au`
- `[yourname]building.com.au`
- `qualitycustomhomes.com.au`

Where to register:

- **Namecheap** - International, affordable
- **VentralP** - Australian, local support
- **Crazy Domains** - Australian
- **GoDaddy** - Popular, good support

Cost: ~\$15-30/year for `.com.au`

Connect Domain to Hosting

For Netlify:

1. Netlify Dashboard → Domain Settings
2. Add custom domain
3. Follow DNS instructions
4. Update nameservers or add A record

For Vercel:

1. Project Settings → Domains
2. Add your domain
3. Update DNS records as instructed

For Traditional Hosting:

1. Point domain nameservers to hosting provider
 2. Update at your domain registrar
 3. Wait 24-48 hours
-

**PROFESSIONAL EMAIL SETUP**

Option 1: Google Workspace (Recommended)

- Cost: \$6/user/month
- Professional email: `info@yourdomain.com.au`
- Gmail interface
- Setup: <https://workspace.google.com>

Option 2: Zoho Mail

- Cost: FREE for 5 users (limited) or \$1/user/month
- Professional features
- Setup: <https://zoho.com/mail>

Option 3: Through Your Hosting

- Usually included with hosting
 - Setup via cPanel
-

**CUSTOMIZATION BEFORE LAUNCH**

Required Changes (Must Do):**1. Business Name**

- Replace "CUSTOM HOMES" in header/footer
- Update with your actual business name

2. Contact Information (Currently placeholders):

- `[Your Phone Number]` → Your actual phone
- `[Your Email]` → Your actual email
- `[Your ABN]` → Your ABN once registered

3. Meta Tags (Line 7 of index.html):

- Update title tag with your business name
- Add your business name to meta description

How to Edit:

1. Open `index.html` in any text editor (Notepad, VSCode, Sublime)
 2. Use Find & Replace (Ctrl+F):
 - Find: `[Your Phone Number]`
 - Replace: `0400 123 456` (your actual number)
 3. Repeat for all placeholders
 4. Save file
-

OPTIONAL CUSTOMIZATIONS

Change Colors:

In `index.html`, find the `:root` section (around line 18):

```
:root {
  --primary-color: #1a1a1a;      /* Change to your brand color */
  --accent-color: #d4a574;      /* Change accent/gold color */
}
```

Change Business Name:

Find and replace these instances:

- Line 94: `<div class="logo">CUSTOM HOMES</div>`
- Line 122: `<h1>CUSTOM HOMES</h1>`
- Footer sections

Add Logo Image:

Replace text logo with image:

```
<!-- Change this: -->
<div class="logo">CUSTOM HOMES</div>

<!-- To this: -->
<div class="logo"></div>
```

TESTING CHECKLIST

Before going live, test everything:

Desktop Testing (Chrome, Firefox, Safari):

- ☐ All images load correctly
- ☐ Navigation links work
- ☐ Smooth scrolling functions
- ☐ Contact button works
- ☐ All sections display properly
- ☐ Footer information correct

Mobile Testing (Phone & Tablet):

- ☐ Open on your phone
- ☐ Test menu toggle button
- ☐ Check all images load
- ☐ Verify text is readable
- ☐ Test all buttons/links
- ☐ Check navigation works

Performance Testing:

- [] Page loads in under 3 seconds
 - [] Images display without delays
 - [] No console errors (F12 → Console tab)
-

SEO SETUP (After Launch)

1. Google My Business

Critical for local visibility:

1. Go to <https://business.google.com>
2. Add your business
3. Verify your business
4. Add photos, hours, services
5. Get reviews from clients

2. Google Search Console

Monitor your site's search performance:

1. Go to <https://search.google.com/search-console>
2. Add your website
3. Verify ownership
4. Submit sitemap

3. Google Analytics

Track visitor data:

1. Go to <https://analytics.google.com>
 2. Create account
 3. Add tracking code to your website
 4. Monitor traffic
-

SOCIAL MEDIA SETUP

Use the copywriting from your package:

Instagram Business Account

- Bio from `website_copywriting.md` (Instagram Bio section)
- Use your website images as posts
- Link to your website in bio

Facebook Business Page

- About section from copywriting doc
- Add website URL
- Use photos from your gallery
- Post regularly

LinkedIn Company Page

- Professional description included in copywriting
- Connect with local builders/suppliers
- Share industry insights

ONLINE PAYMENTS (Future)

When you're ready to accept online deposits:

Stripe:

- Easy integration
- 1.75% + 30c per transaction
- Setup: <https://stripe.com>

Square:

- Good for in-person + online
- Similar rates to Stripe
- Setup: <https://squareup.com>

Paypal:

- Widely trusted
- Slightly higher fees
- Setup: <https://paypal.com>

LEGAL REQUIREMENTS (Australia)

Before Launch:

- ☐ Register business name (ASIC)
- ☐ Get ABN (Australian Business Number)
- ☐ Register for GST (if required)
- ☐ Get builder's license (NSW Fair Trading)
- ☐ Get insurance (Public Liability + Professional Indemnity)

On Website:

- ☐ Display builder's license number
- ☐ Privacy policy page (if collecting emails)
- ☐ Terms and conditions (recommended)
- ☐ ABN footer display

POST-LAUNCH MARKETING

Week 1:

- ☐ Announce on personal social media
- ☐ Email friends/family/contacts

- ☐ Share in local Facebook groups
- ☐ Post in industry forums

Month 1:

- ☐ Google My Business listing active
- ☐ Social media accounts established
- ☐ Business cards printed with website URL
- ☐ Vehicle signage ordered

Month 2-3:

- ☐ Start blogging (add blog section)
- ☐ Guest post on local blogs
- ☐ Partner with real estate agents
- ☐ Join local business networks

TROUBLESHOOTING

Images Not Loading:

- Check file paths are correct
- Ensure `images_optimized` folder uploaded
- Verify image file names match HTML

Mobile Menu Not Working:

- Check JavaScript is included (it's in index.html)
- Test in different browsers
- Clear browser cache

Slow Loading:

- Use optimized images (included in package)
- Check hosting provider speed
- Consider upgrading hosting plan

Contact Form Not Working:

- Current version has buttons only
- To add working form, use:
- Netlify Forms (free)
- Formspree (free tier available)
- Google Forms integration

QUICK LAUNCH CHECKLIST

Ready to go live? Complete these steps:

Phase 1: Preparation (Today)

- ☐ Edit placeholders in index.html

- ☐ Add your business name
- ☐ Add contact information
- ☐ Add ABN (if ready)
- ☐ Test locally

Phase 2: Domain & Hosting (This Week)

- ☐ Register domain name
- ☐ Choose hosting provider
- ☐ Upload website files
- ☐ Connect domain to hosting

Phase 3: Final Checks (Before Announcing)

- ☐ Test on desktop
- ☐ Test on mobile
- ☐ Verify all images load
- ☐ Check contact information
- ☐ Test all navigation

Phase 4: Launch! (Announcement Day)

- ☐ Set up Google My Business
- ☐ Create social media accounts
- ☐ Post announcement
- ☐ Email contacts
- ☐ Order business cards

Phase 5: Growth (Ongoing)

- ☐ Collect client testimonials
- ☐ Replace AI images with real photos
- ☐ Add completed projects
- ☐ Regular social media posts
- ☐ Monitor analytics
